Forecast for Tuesday 05 Apr 2022

Weather: Cloudy throughout with outbreaks of rain and drizzle, though a few drier interludes too especially around the middle of the day.

Chance of cloud-free hill tops above 800m: Generally less than 10% but nearer 30% around the middle of the day.

Low cloud and visibility: Extensive low cloud at 600m with patches to 450m in the west, but probably lifting to 900m with patches to 600m around the middle of the day for a time. Occasionally poor visibility in rain but some periods of good visibility away from the cloud around the middle of the day.

Mountain Weather Forecast

Ground Conditions Supplement

Date: Monday 4 April. Location: Helvellyn summit at 12:00. Full report: The vast majority of last weeks snow has now melted with just a few small patches at altitude in hollows and on paths where it has been compressed by walkers feet. There are also still a few patches of older snow to be found on steep north through east aspects above 900m but these are easily avoided. Striding & Swirral Edge are now both snow free. Snow is again forecast to fall on the hills in the latter part of the week so please continue to check the forecasts and altered your plans accordingly. Temperatures are forecast to be well below the seasonal average so go prepared with plenty of warm and waterproof layers, hats & gloves and a map & compass for navigation. Temperature: 5C. Maximum wind speed 36.4mph. Wind chill: -2.5C. Average wind speed: 29.8mph.
